

by a murderous and demented totalitarian tyranny such as the Castros' (actions like "attempting to leave the country without permission").

While countless thousands of Cubans suffer in the tyranny's infernal gulag, tourists visit the island's "delights", enjoying the regime's apartheid tourism system and partaking of the child prostitution promoted by the Castros' regime. Heads of State and government, foreign ministers and other "dignitaries" flock to totalitarian Cuba, partaking in the regime's sponsored "delights", and bringing ignominy to the nations they allegedly represent.

But, Madam Speaker, I rise to remind my colleagues of the real Cuba. I rise to remind my colleagues that Omauris Rondon Rivero, and thousands of others who suffer in the Castros' gulag, exist. That they represent the best of the Cuban nation. That they represent the future of Cuba, a free and democratic Cuba. And I rise to demand the immediate and unconditional release of Omauris Rondon Rivero and all the political prisoners in the nightmare that is totalitarian Cuba.

THE INTRODUCTION OF THE WORKING FAMILIES' FLEXI- BILITY ACT

HON. CAROLYN B. MALONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 3, 2009

Mrs. MALONEY. Madam Speaker, I am pleased to introduce the Working Families' Flexibility Act, which will ensure that working Americans can ask their employer for modified schedules so they can balance the demands of their jobs and their home life.

Modeled on successful legislation adopted in the United Kingdom, the legislation would give employees a right to request modification of their hours, schedule, or work location. It would require employers to seriously consider all such requests in a timely manner, and provide an explanation for requests that are denied. The bill also includes job protection for employees who make flexibility requests. Small businesses would be exempt from this bill, and the Department of Labor would be called upon to develop regulations for the flex-time process.

This bill will raise awareness of the rising need for flexible work schedules, and will protect employees who are nervous about requesting a change in schedule. Called the "soft-touch" law in the UK, it would not place undue burden on businesses, it only asks that they evaluate these requests and provide a response explaining their decision, whatever it is. Adopting a flexible workplace has been shown to reduce turnover, which helps employers cut costs and retain valuable employees. In the UK, over 80 percent of requests have been approved and over 80 percent of employers report no adverse effect from the legislation.

AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009

HON. LUCILLE ROYBAL-ALLARD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 3, 2009

Ms. ROYBAL-ALLARD. Madam Speaker, I rise in strong support of H.R. 1, the American Recovery and Reinvestment Act.

We are all painfully aware that our nation is in a deep economic recession. The grim numbers from the Bureau of Labor Statistics begin to tell the story. For months the unemployment rate has been rising and in January nearly 600,000 jobs were lost. This is the highest number of jobs lost in a one-month period since 1974. It is estimated that if joblessness continues at the same rate, unemployment rates will be in the double digits by summer and the highest unemployment level since the Great Depression.

Economists on both sides of the aisle agree that we need swift and robust action to counter this troubling downturn. By making needed investments in areas such as infrastructure, healthcare, and education H.R. 1 will address rising joblessness by creating jobs in areas where investment will make a long-term impact. In my home state of California it is expected that the measure will create or save close to 400,000 jobs.

As a healthcare advocate I am particularly pleased that the bill also provides \$1 billion to restore state and local health department jobs that will be lost in the next year due to budget cuts. Not only will this funding keep thousands of people employed, it will also ensure that the public continues to receive critical prevention and wellness programs that these employees provide. Moreover, it is essential that we ensure the stability of our public health infrastructure which is critical to national and local responses to natural or man-made catastrophes.

I am also gratified that the bill includes funding to address critical health care workforce shortages. At a time when millions of Americans are unemployed, there are well over 140,000 unfilled registered nursing jobs in our hospitals, nursing homes and community health centers. To address this need the bill includes \$500 million for nurse training.

The bill also allows governors to spend up to \$10 billion for school modernization. The funding provided for school renovation and repair is essential to address the nation's crumbling education infrastructure. Our nation's students and teachers deserve to learn and work in buildings that are not crumbling around them.

There is no dispute that economic conditions will get worse before they get better. The American Recovery and Reinvestment Act is an important step forward in reversing the course of the current recession. It will provide a desperately needed boost to our ailing economy, and will provide American families with a needed social safety net as they weather the worst of this economic crisis.

I urge my colleagues to vote yes to stabilize our economy and assist Americans impacted by this crisis.

EARMARK DECLARATION

HON. VERN BUCHANAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 3, 2009

Mr. BUCHANAN. Madam Speaker, pursuant to the Republican Leadership standards on earmarks, I am submitting the following information for publication in the CONGRESSIONAL RECORD regarding earmarks I received as part of H.R. 1105, the Omnibus Appropriations Act, 2009:

Requesting Member: Congressman VERN BUCHANAN

Bill Number: H.R. 1105

Account: Cooperative State Research Education and Extension Service—SRG

Legal Name of Requesting Entity: Florida Citrus Mutual

Address of Requesting Entity: Lakeland, FL 33802

Description of Request: I secured \$1,217,000 for the continuation of vital citrus canker research by the UF-IFAS, through the Cooperative State Research Extension and Education Service (CSREES), to improve technologies for treatment and detection, methods of movement and containment, and means to control and eliminate this devastating citrus disease.

In 2005, USDA-Animal Plant Health Inspection Service (USDA-APHIS) detected citrus greening in Florida. This is yet another severe citrus disease that must be addressed. USDA-APHIS and ARS are working in conjunction with Florida Department of Agriculture and Consumer Services Division of Plant Industry (FDACS-DPI) and UF-IFAS to develop a joint citrus health production plan for an interim period, while the scientific community works to find disease resistance and/or a cure for these diseases. Research efforts will include management of citrus canker and greening to minimize tree mortality and yield loss in a cost effective manner, as well as the economic implications of these diseases in world citrus markets. This joint, coordinated research is not only imperative to Florida citrus, but also important to all U.S. citrus production.

Requesting Member: Congressman VERN BUCHANAN

Bill Number: H.R. 1105

Account: Health Resources and Services (HRSA) Health Facilities and Services

Legal Name of Requesting Entity: University of South Florida Sarasota-Manatee

Address of Requesting Entity: 8350 N. Tamiami Trail, Sarasota, FL 34243

Description of Request: I secured \$143,000 to address nursing shortages by supporting educational development at the University of South Florida Sarasota-Manatee Campus

Critical nursing shortages throughout the United States continue to grow as the population ages and the nursing workforce approaches retirement age. The University is in the initial stages of preparing for separate academic accreditation. Once this is achieved, their highest priority will be to establish a College of Nursing on the campus. With a nursing program in place we will be able to reach and educate the southern-most portions of Florida. The funds from this proposal will be spent to support the development of a teaching simulation laboratory (equipment and simulation models) on our campus, for equipping a video-conference classroom, and the development of web, on-site, and blended courses.
